■ Legal Tech

Information Analysis

Saving time and cost

Key features

- Forensically sound data collections from all sources
- Data processing and filtering
- Mobile device forensics and review
- Case dynamics and transcripts for depositions
- Advanced analytics and machine learning tools
- Continuous active learning and predictive models
- Clustering, concept searching and communication analytics
- Automatic redactions

Relativity | NexLP | Brainspace | Blackout

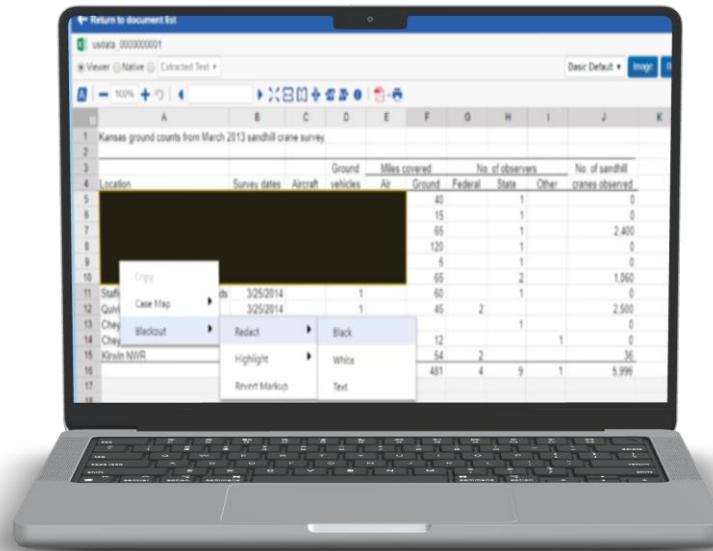

Key benefits

-  Reduces datasets by 60 % – 90 %
-  Removes not responsive data sets
-  Significant time and cost reduction
-  Sentiment analysis
-  Legal privilege
-  Secure (i. a. ISO 27001 certified)
-  Specific permissions options
-  Choice of regional data centers

Automated redactions

Key features

- Seamlessly integrated add-on for Relativity
- Auto-redacts sensitive information in images, native PDF and Excel files
- Redacts hidden information incl. attachments, notes, comments
- Quality check with approval, reject and override options
- Mass import/export functions via .CSV file
- Produces secure files

Key benefits

-  Redacting words, phrases, and text patterns simultaneously
-  Reducing potential for human errors
-  Ensuring data privacy standards
-  Increasing efficiencies
-  Reducing time and cost significantly
-  Retaining native documents
-  Securing privileged information

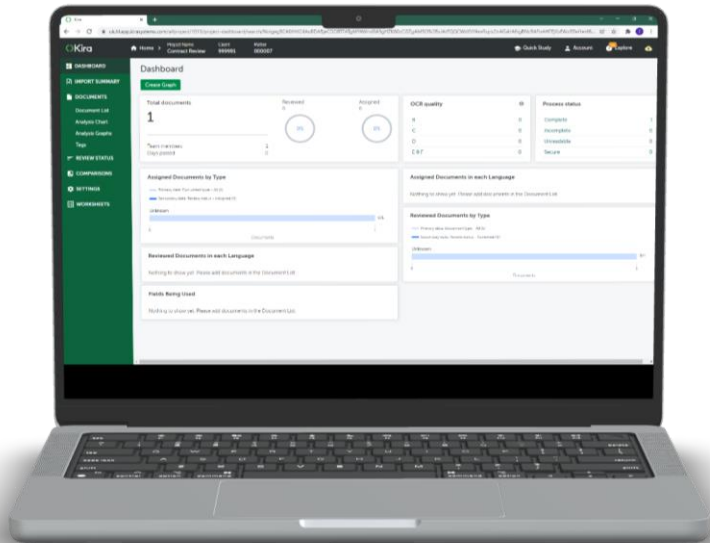

Kira

Automated contract review

Key features

- Supports comprehensive document analysis
- Identifies relevant information in sets of documents
- Finds concepts and provisions — not only keywords
- Creates models based on real examples
- Uses natural language processing
- Leverages machine learning

Key benefits

-  Increased efficiency
-  Significant cost reduction
-  Precise results using accuracy metrics
-  Easy to use document viewer
-  Secure (i. a. ISO 27001 certified)

Simple process

Provide real examples

Kira studies examples

Kira creates model

Kira finds concepts, not only keywords

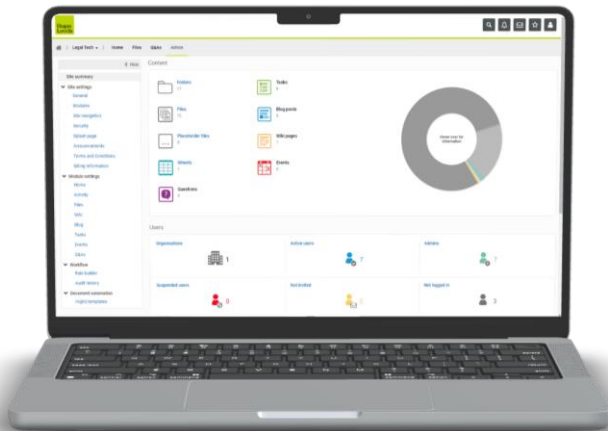

■ Legal Tech

Information Structuring

Stores case data in a smart and efficient way

Key features

- Deal rooms and workflow management
- Automated structuring of uploaded documents
- Customizable user interface and dashboards
- Q&A and communication functionality
- In-tool editing of documents
- Reporting features for admins

▲ Increased control and collaboration

▼ Reduced email traffic

Key benefits

24/7 global access

All information searchable

Legal privilege

Storage on protected servers with data privacy management

Secure (i. a. ISO 27001 certified)

2-factor-authentication

No licensing fees, only fees for actual use

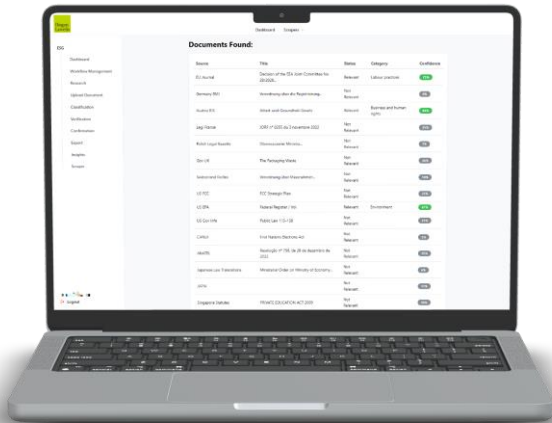

Specific permissions options

AI-powered regulatory updates

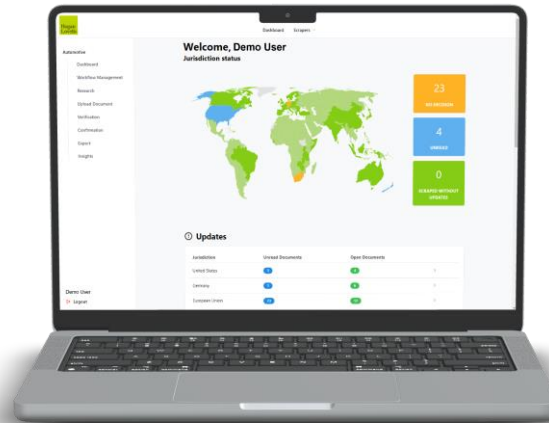

Let AI do the hard work

- Automated scraping of sources
- Automated classification of relevancy
- Multiple languages included
- Results exported into database

Let your teams collaborate

- Daily updates and notifications
- Workflow management
- Assignment of tasks
- Comparison by jurisdiction

Key benefits

Applicable for all jurisdictions, industries and fields of law

Coverage of entire regulatory process

Reduction of irrelevant results

Reduction of manual review time

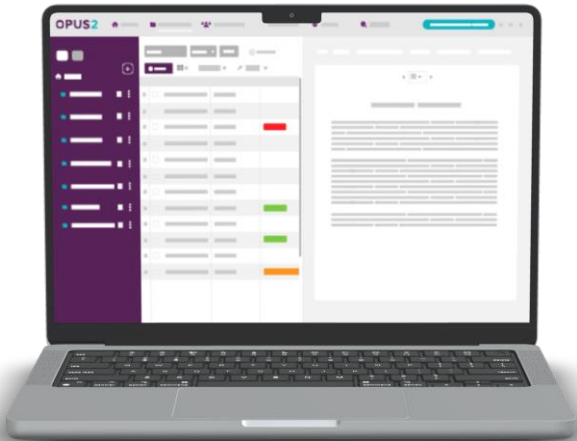

Significant cost savings

Case management tool

Key features

- Efficiencies for all litigation, arbitration, and investigation cases
- Efficient management of documents (tags for topics, people, annotations)
- Easy creation of event chronologies (links to key characters, witnesses, evidence)
- Witness folders for interviews
- Trial preparation with ability to export bundles to work offline if needed

Key benefits

Reduced operational inefficiencies

Effective collaboration across case teams

Instant sharing of ideas and evolving strategies

Simple addition of content “as you go”

Clients integrated into project lifecycle

Reduced information security risk

Support for depositions and hearings

Secure workspaces for all case-related information

Annotation and collaboration in real time

Management dashboards, custom branded portals

Centralized fact rooms

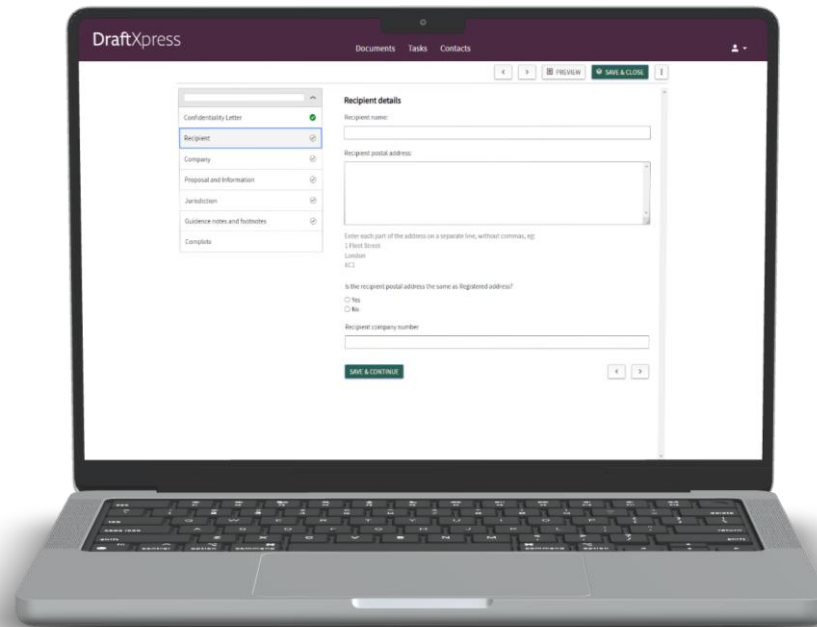

■ Legal Tech

Specific Use

Automates contracts and legal documents

Key benefits

-  Uses simple online questionnaire
-  Quickly generates first draft
-  Removes repetitive and unnecessary tasks
-  Reduces risk of drafting errors
-  Increases accuracy
-  Promotes consistency
-  Saves time

Suitable for legal documents across industries and sectors including those used in mass litigation which:

Are regularly produced with a high volume

Have recurring fields such as 'party details'

Contain clauses that can be added or removed by asking simple questions

Are part of a suite of documents that contain similar basic information

Efficiently manages thousands of cases

Key features

- Electronic case files and case lists
- Customizable dashboards (courts, wins/losses, etc)
- In-tool editing of documents
- Responsible lawyers indicated per case
- Deadline monitoring
- Tracking of tasks and progress

Key benefits

-  24/7 global access
-  Legal privilege
-  Secure (i. a. ISO 27001 certified)
-  2-factor-authentication
-  Specific permissions options
-  All information searchable
-  Storage on protected servers with data privacy management
-  No licensing fees, only fees for actual use

Automated internal risk assessment

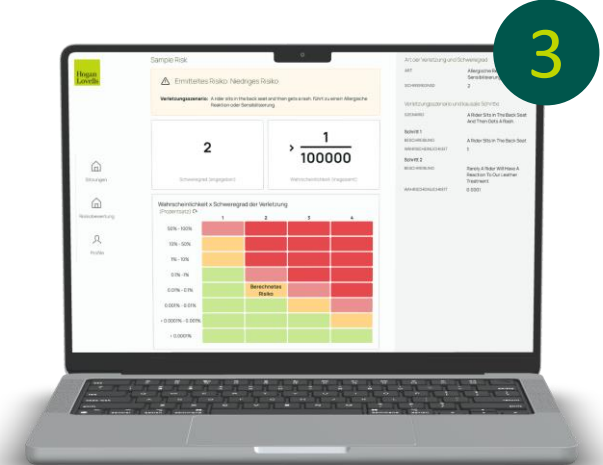

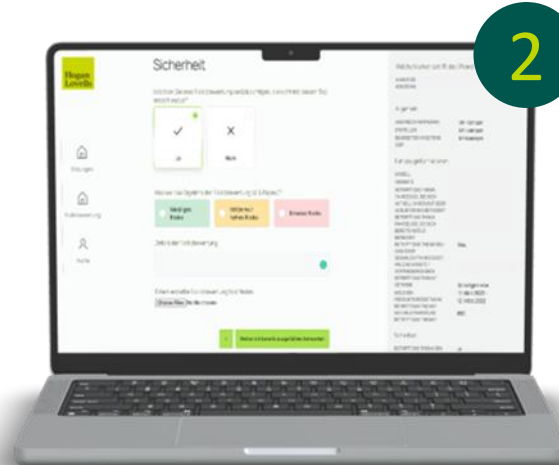

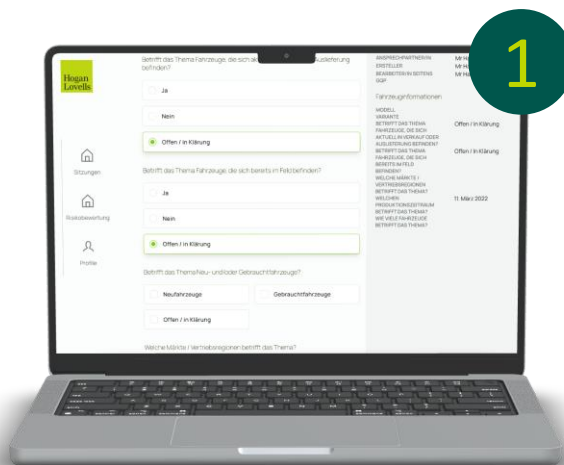

Key features

- Questionnaire co-developed with client
- Three-step risk assessment process
- Clear guidance throughout
- Recommended course of action

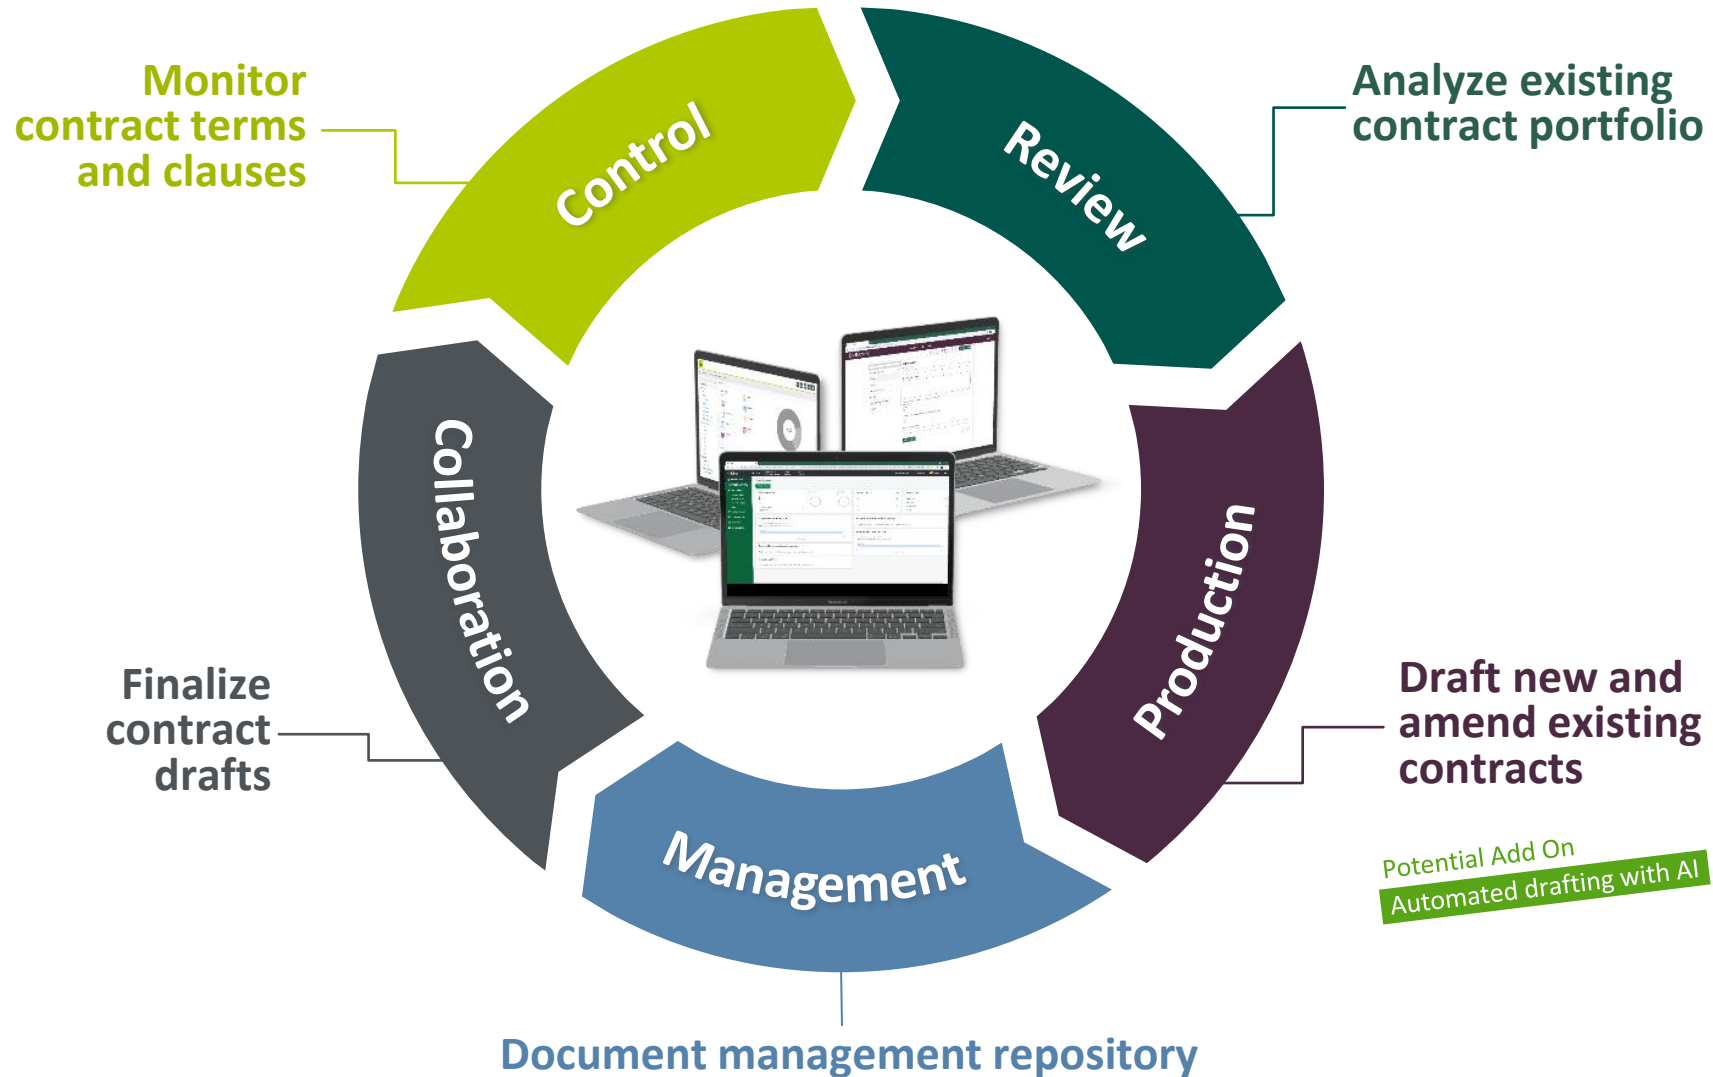

Key benefits

-  Suitable for various risk scenarios
-  High efficiency and consistency
-  Complete in-tool documentation
-  Easy and intuitive navigation

-  Storage on protected servers with data privacy management
-  24/7 global access
-  Secure (i. a. ISO 27001 certified)

Management process

Key benefits

-  Reduction of errors and omissions
-  Increased speed and efficiency
-  Reduction of manual review time
-  Increased collaboration
-  Background knowledge from experienced lawyers
-  Legal advice as potential add-on

■ Legal Tech

Reporting

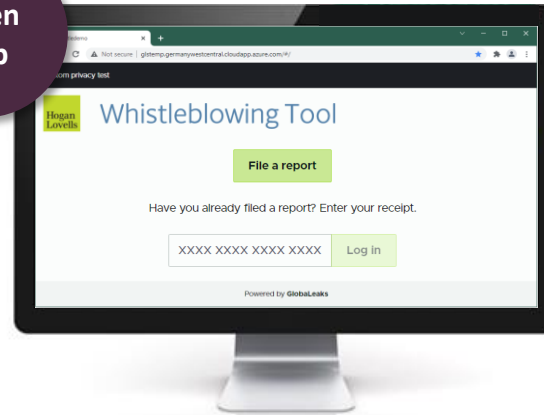

Whistleblowing Tool

Customizable solution

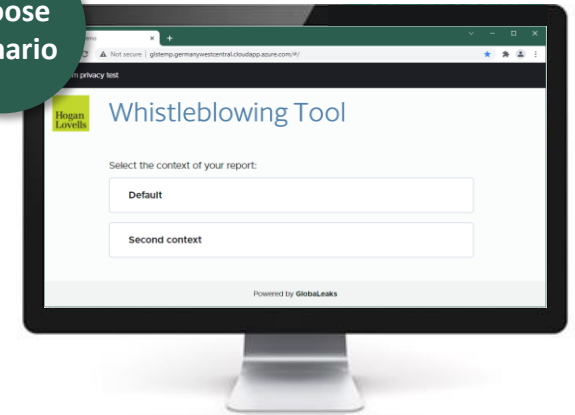

Key benefits and features

-  Easy to handle
-  Allows anonymous reporting
-  Allows different reporting scenarios
-  Allows attachments to reports
-  Individual code for every report
-  Available in multiple languages
-  24/7 global access
-  Secure (i. a. ISO 27001 certified)
-  Protected data storage in Microsoft Azure cloud
-  High degree of confidentiality

■ Gifts & Hospitality App

Simple approval process

Inviting clients or accepting gifts can be challenging from an anti-bribery and corruption point of view.

Internal approval processes can be time-consuming and inefficient, especially for a globally operating company.

The Gifts & Hospitality app helps

Automatic addition of expenses with warning feature

Red flag blocker

Country-specific limits and company guidelines adjustable

GPS tracking possible

Secure operation in company's internal system environment

Individual dashboards and design

Available in multiple languages

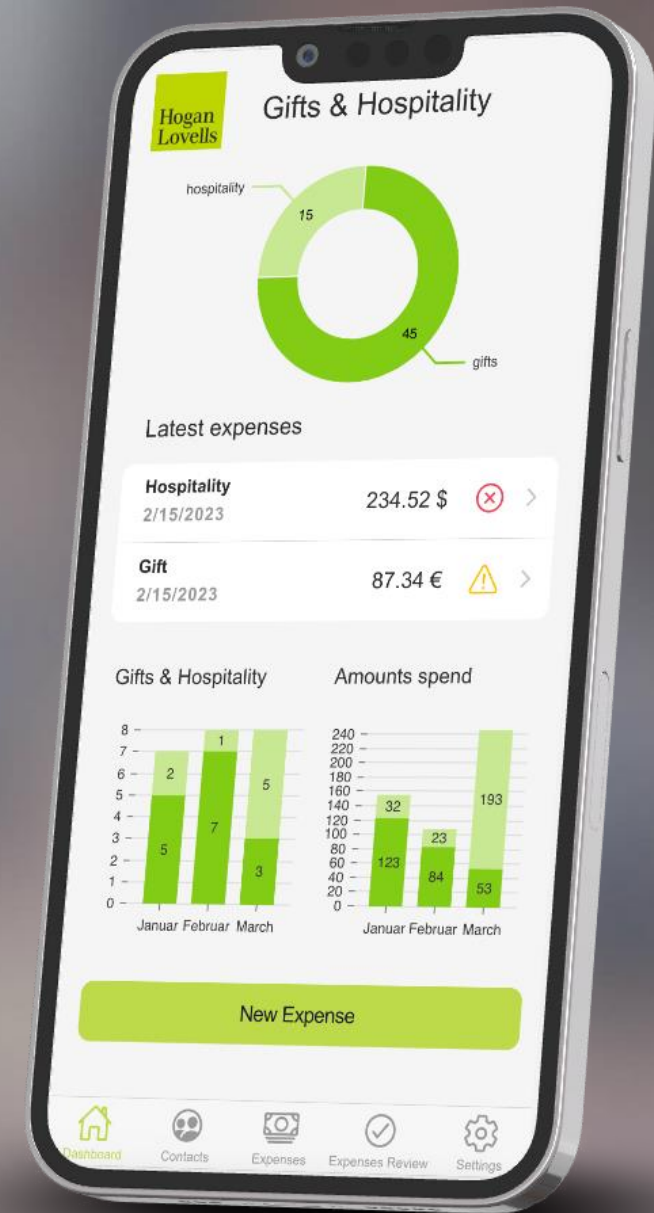

Training features and FAQs

Complete, automated documentation

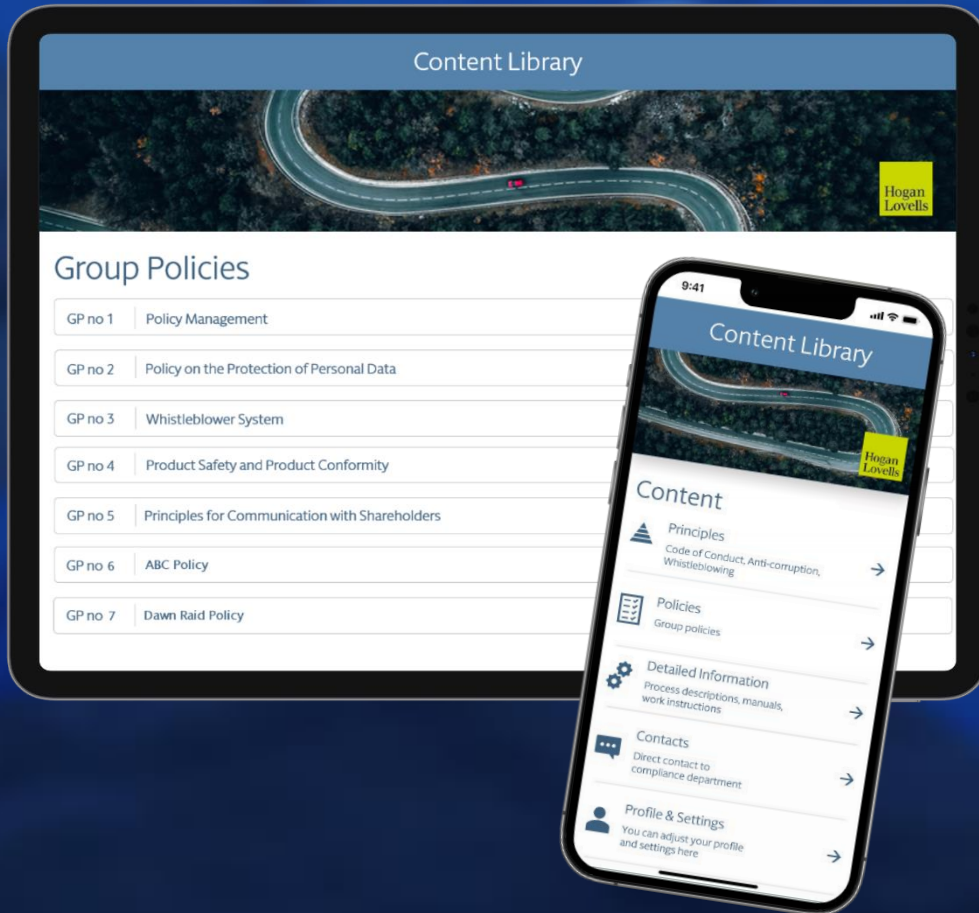

Templates available (e.g. for works council)

Library app

Access legal content from your phone

Structured repository for

Documentation

Recordings

Presentations

Surveys

■ Legal Tech

Consulting Service

Our team of legal tech consultants

Legal departments are looking for ways to automate repetitive tasks, leverage machine learning, increase efficiency and ultimately save time and money.

Many legal tech companies promise to deliver solutions. But only few consultants have the legal background and the resources to actually add value.

Our team of legal tech consultants has years of experience and can help assess your needs, offer bespoke solutions and implement tools that will work for you.
